

Electronic Payments

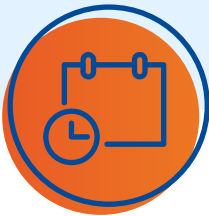

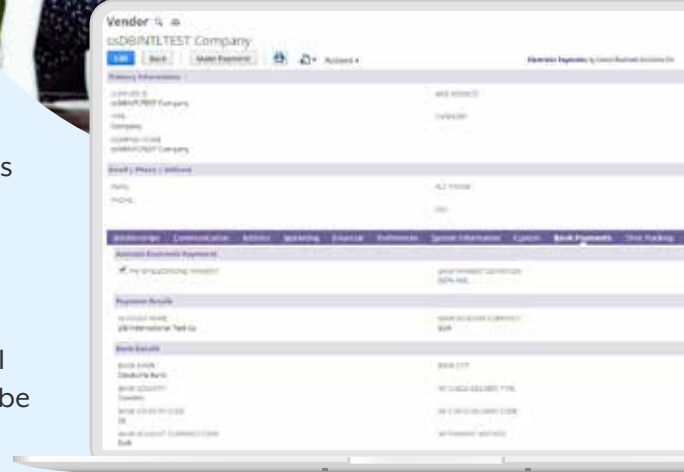

Effectively and efficiently automate electronic payments to vendors.

Pay bills electronically and eliminate the printing of paper checks.

Electronic Payments (EP) has the flexibility to configure file formats required by your banking software and to create output files containing the instructions to pay your vendors.

User definable formats allow companies to define an unlimited number of export definitions, including cross-border international file formats. Complicated bank definitions and custom fields can be included in the file definition for bank-specific or country-specific requirements.

Integrated = Simple and Flexible

Only requires basic payment account details for each payee. It also supports a wide variety of formats used by banks around the world allowing flexibility.

Better Time Management

Electronic Payments for NetSuite helps bring the time taken for the payment of vendors and employees down from hours to minutes.

Efficient and Effective

Pay bills electronically and eliminate the printing of paper checks and the hassle of depositing checks.

What our clients say:

"Great job everyone, thank you for the fantastic team effort and for saving my right arm from signing manual checks!"

- Kevin Furlong, Corporate Controller

Electronic Payments
