

Electronic Payments for Microsoft Dynamics GP

Effectively and efficiently automate
electronic payments to vendors.

Pay bills electronically and eliminate the printing of paper checks.

Electronic Payments (EP) for Dynamics GP has the flexibility to configure file formats required by your banking software and to create output files containing the instructions to pay your suppliers. User definable formats allow companies to define an unlimited number of export definitions, including international file formats. Complicated bank definitions and custom fields can be included in the file definition for bank-specific or country-specific requirements.

Key Features

Supports multiple
payment methods,
including ACH, Wires,
online checks & credit cards

Full audit trail enables
you to track who has
been paid and when

Supports multi-currency

Supports unlimited
user definable
export file formats
and custom fields

Eliminate overhead
costs associated with
check payments

Enhanced cash
flow forecast

Your Benefits

Manage the whole payment process from a single tab
Lower administrative and payment processing costs
Save time and reduce errors
