# eRequest
for Microsoft Dynamics GP

A web-based procurement solution that works seamlessly with Microsoft Dynamics GP for complete spend control.

Take control of your business spending.

eRequest allows you to leverage the expense and procurement control benefits of traditional purchasing procedures without incurring the associated financial overhead or administrative burden.

Set up your requisition and expense pages based on the data your users need to enter. The high level of configuration allows eRequest to be used in a variety of ways to suit your business requirements

Key Features

Data entry form designer	**Real-time lookup and search on Microsoft Dynamics GP data**	**Multi-currency and Buyer ID functionality**
Requisition against Project Accounting	**Commitment and Analytical Accounting**	**Utilizes PowerBI to give you the data you need**

Your Benefits

Budget and expense control
Automated Approval workflows
Fully integrated systems
